SUMMARY

Flutter Developer with 3+ years of experience building and releasing cross-platform mobile apps for Android and iOS using Flutter and Dart. Skilled in responsive UI from Figma, REST API and JSON integration, Firebase (Authentication, Firestore, Cloud Messaging), state management (BLoC, Riverpod, Provider, GetX), Clean Architecture, MVVM, and SOLID. Experienced in unit, widget, and integration testing, performance optimization, and Git/GitHub code reviews within Agile/Scrum teams.

TECHNICAL SKILLS

Languages

Dart Python Java

Frameworks & Tools

Flutter Firebase Git & GitHub Figma

State Management

BLoC Riverpod Provider GetX

Architecture

Clean Architecture MVVM OOP SOLID

Backend & Data

REST API JSON Firebase Auth Firestore Cloud Messaging (FCM) MongoDB NoSQL

Local Storage

SQLite (Sqflite) SharedPreferences Hive

Testing

Unit Tests Widget Tests Integration Tests

Mobile Features

Push Notifications Google Maps Real-time Tracking Localization

Delivery & Process

Google Play App Store Agile / Scrum Code Reviews Pull Requests

WORK EXPERIENCE

Mobile Developer — Feur Media House

Dec 2023 – Present

- Build reusable, scalable, and maintainable cross-platform apps for Android and iOS using Flutter and Dart.
- Implement responsive UI from Figma design specs, following Clean Architecture, MVVM, and SOLID principles.
- Integrate REST APIs, JSON, authentication, and third-party services; connect Firebase (Authentication, Firestore, Cloud Messaging).
- Manage state with BLoC, Riverpod, Provider, and GetX, and handle local storage with SQLite, SharedPreferences, and Hive.
- Write unit, widget, and integration tests; debug issues and optimize performance, app startup, and UI rendering.
- Use Git/GitHub for pull requests and code reviews, and collaborate with designers, backend, and product teams in Agile/Scrum.
- Build and release apps to the Google Play Store and Apple App Store.

SELECTED PROJECTS

Hailing Trades — Marketplace app that connects clients with skilled tradies — carpenters, painters, and builders — to solve household and commercial jobs fast. Clients request services and chat in real time, while tradies and apprentices manage jobs, schedules, quotes, and client interactions from one place.

Flutter · Dart · REST API · GetX · Pusher (for push notifications & chat) · Live on [Google Play](#) & [App Store](#)

Talib Al-illm — Modern Islamic e-learning platform where teachers create and upload courses and students enroll in subjects like Aqeedah, Fiqh, Hadith, and Tafsir. It supports recorded and live classes, multilingual content, and a simple learning experience for individuals and families.

Flutter · Dart · REST API · Riverpod

Ultimate Patrol — Security app for bodyguards, managers, and users who need protection. Bodyguards manage patrol routes, track real-time location, and respond to emergencies, while users can request help at any time and stay safe with just a few taps.

[Flutter](#) · [Dart](#) · [REST API](#) · [Riverpod](#) · [Real-time Tracking](#)

Ez Compliance — Comprehensive platform that helps companies manage employee data, reports, and compliance tasks in one place. It simplifies tracking employee performance, generating reports, and keeping up with regulatory compliance for growing teams.

[Flutter](#) · [Dart](#) · [REST API](#) · [Provider](#)

Sydney OzTag — Sports app that keeps players, coaches, and fans connected with the OzTag community. Users track live scores, manage teams, view schedules, and access player stats, with real-time match results and interactive features in one place.

[Flutter](#) · [Dart](#) · [REST API](#) · [BLoC](#)

Flutter Developer — Freelance

Nov 2022 – Dec 2023

- Built and delivered multiple Flutter apps end to end for clients, from setup to store release, with clean, reusable code.
- Worked with Firebase, REST APIs, JSON, and local storage (SQLite, SharedPreferences) across different state-management setups.

SELECTED PROJECTS

Notes App — Note-taking app to create and manage notes with titles, voice recordings, images, moods, and alarms. Users organize notes into folders, mark favorites, and pick themes and view styles, with Arabic and English support and dark and light modes.

[Flutter](#) · [Dart](#) · [Provider](#) · [Sqflite](#)

E-commerce App (Reshop) — Online shopping app where users browse products and add items to a cart, then send orders after authentication. Shoppers can choose a delivery location and view offers and best sellers, with data and orders powered by Firebase.

[Flutter](#) · [Dart](#) · [Provider](#) · [Firebase](#)

Restaurant App — Responsive restaurant app that shows meals with prices and full details. After signing in, users can save favorites, add items to the cart, order online, and book tables for a smooth dining experience.

[Flutter](#) · [Dart](#) · [REST API](#) · [Provider](#)

Amal Chemistry & OOC — Two learning platforms — Amal Chemistry for chemistry courses and OOC for ophthalmology — offering rich study materials and resources. Both use a clean, intuitive interface so students can easily browse courses and their content.

[Flutter](#) · [Dart](#) · [REST API](#) · [Provider](#)

EDUCATION & TRAINING

B.Sc. in Computer & Information Technology — GPA 3.2 / 4.0

2016 – 2019

Egyptian E-Learning University (EELU) — Information Technology

Front-End & Cross-Platform Track (Intensive)

2022

Information Technology Institute (ITI), Assiut

IT Administration Track (Intensive)

2021

Information Technology Institute (ITI), El Mansoura
